Computer science and data science undergraduate building Python applications and applied-AI prototypes with AI-assisted development and hands-on testing.

EDUCATION

Nalla Narasimha Reddy Education Society's Group of Institutions (NNRG)

B.Tech in Computer Science | In progress - Expected 2029

Indian Institute of Technology Madras

BS in Data Science and Applications | In progress - Expected 2029

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, HTML, CSS

Web & data: FastAPI, Flask, React, PostgreSQL, SQLite, Redis, Celery

Applied AI: PyTorch, OpenCV, InsightFace, ONNX Runtime, Hindsight

Tools: Git, pytest, Cloudflare, Google Colab, Kaggle, Rclone

PROJECTS

Attendance ERP | In-progress prototype

- Develop a Flask/PostgreSQL college-workflow prototype connecting InsightFace recognition with enrollment, attendance records, review, and reporting.
- Integrate Celery/Redis processing and bulk imports; test capture quality, replay scenarios, and CPU/GPU fallback.

Vendor Payment Memory Agent | Hackathon demo

- Built a FastAPI demo that recalls prior invoice-exception resolutions with Hindsight to suggest actions for human review.
- Added invoice validation and duplicate checks, with a local JSONL fallback when the memory service is unavailable.

Image Segmentation Research | Research prototype

- Compared U-Net and DeepLabV3 in PyTorch using validation-based model selection and a separate held-out test set.
- Exported a model for ONNX CPU inference; added resumable checkpoints.

Google Drive Photo & Video Uploader | Self-hosted project

- Built a FastAPI and JavaScript uploader with chunked transfers, retry/resume, and a virtualized browser queue.
- Connected background Rclone transfers to Google Drive with per-file progress.

LEADERSHIP & ACTIVITIES

- Organized and led CodeMania and C Hunt technical events at NNRG.
- Participated as a delegate at NNRG MUN 2026.
